- 

## Viewing a Group of Symbols As Charts

---

1. Go to an existing chart or open a chart.
2. Select **Chart >> Associated Watch List**. Each chart has its own associated watch list.
3. Add all of the symbols you want to watch to this list. Press the **Add** button before adding each symbol. After pressing the **Add** button, type the symbol into the symbol text box at the bottom of the watch list window. Use the **Find** button to quickly locate a symbol and insert it.
4. Enable the **Watch List Mode** option.
5. This window can be remain open at all times.
6. Make sure that **Chart >> Only Symbols in Watch List** is enabled.
7. Select **File >> Save** to save your chartbook so that all of your symbols are saved.
8. Simply click on a symbol in the list to change the chart to that symbol. Charts can be [linked](#) in order to change the symbol of other linked charts as well.
9. An alternative way to move through the symbols is to press the plus + or minus - keys on your keyboard to go forward or backward among the symbols in list.

## Viewing a Group of Symbols As Quote Lines

---

1. Setup a Quote Board Spreadsheet that contains all the symbols that you want to look at. For complete instructions, refer to [Getting Quotes](#).
2. Once this is done, then you can use the [Spreadsheet >> Open Historical Chart](#) and [Spreadsheet >> Open Intraday Chart](#) commands to open up charts for your symbols on the Spreadsheet.
