

Additional Language Support

- [Instructions](#)
- [Revert To English](#)
- [Generating the DefaultMenuCustomizations.xml File](#)

Instructions

Follow these steps to translate the Sierra Chart menus to the desired language.

1. [Update](#) Sierra Chart to the current version.
2. Select **Global Settings >> Customize Menu Items**.
3. From the **Available Preconfigured Customizations** list, select the particular language you want to use.
4. Press the **Set** button.
5. Press the **OK** button.
6. Restart Sierra Chart for a thorough translation of all menu items.

Individual menu items can be customized any way that you require following the [Customize Menu Items](#) instructions.

Revert To English

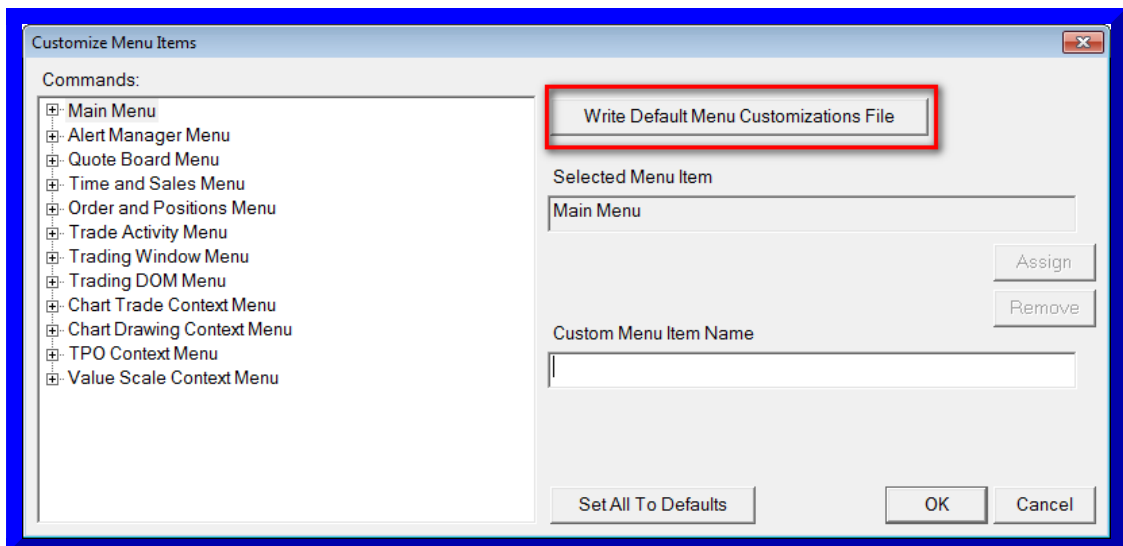

Follow these steps to revert the Sierra Chart menus to English.

1. Select **Global Settings >> Customize Menu Items**.
2. Press the **Set All to Defaults** button.
3. Press the **OK** button.
4. You may need to restart Sierra Chart for a thorough setting of all menu items to default.

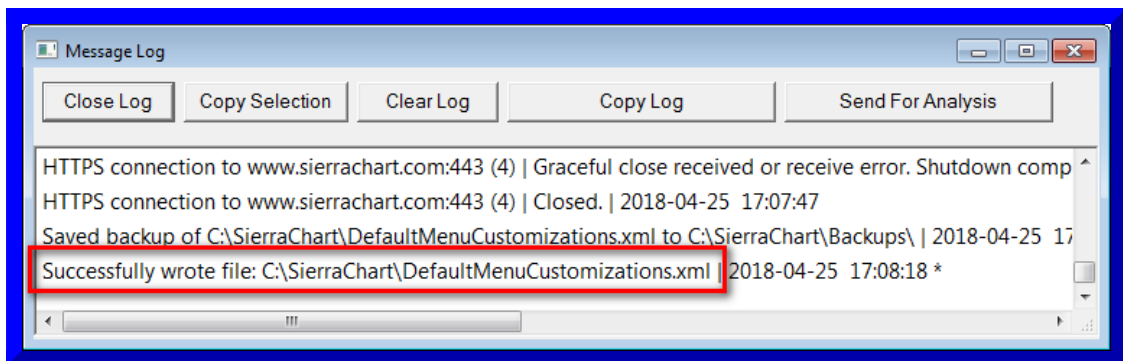

Generating the DefaultMenuCustomizations.xml File

It is possible to generate a default menu customizations XML file from within Sierra Chart to allow the editing of each and every menu command within the program with a custom name. This allows for easy direct editing of an XML. Follow the steps below:

1. Select **General Settings >> Customize Menu Items**.
2. Press on the **Write Default Menu Cutomizations to File** button.

3. Press **OK** to close the dialog.
4. The file will be saved to the Sierra Chart program folder, the location will also be shown within the **Message Log**.
