

# Secure Browsing

- [Introduction](#)
- [Supported Browsers](#)
  - [Firefox](#) (Recommended)
  - [Chrome](#)
  - [Opera](#)
  - [Internet Explorer \(IE\)](#)

---

## Introduction

[TLS \(Transport Layer Security\)](#) version 1.1 or higher needs to be enabled on your web browser to access the [PCI DSS](#) (data security standard) compliant payments server.

---

## Supported Browsers

---

### Firefox - (Recommended)

We recommend the use of Firefox. You can download it from [here](#).

Make sure you are running the latest versions of Firefox. TLS 1.1 and TLS 1.2 are enabled by default starting with version 27.

---

### Chrome

Make sure you are running the latest versions of Chrome. TLS 1.1 and 1.2 are enabled by default.

---

### Opera

Make sure you are running the latest versions of Opera. You also need to enable TLS 1.1 and TLS 1.2 in Opera under **Opera >> Settings >> Preferences >> Advanced >> Security >> Security Protocols**.

---

### Internet Explorer (IE)

Make sure you are running the latest versions of Internet Explorer. Make sure TLS 1.1 and 1.2 are enabled under **Tools >> Internet Options >> Advanced**, you will need to scroll down to the **Security** section.
